

## **Safadi Foundation: Empowering Women Through Wealth in Minds**

- Economic empowerment
- Vocational training
- Civic education
- Health & environmental awareness
- Creative arts
- Psychological support
- Peace-building
- Community resilience

### **Social Development Sector**

Located in the heart of Old Tripoli, the Women's Academy has been providing valuable community-based services since 2006. The Academy serves as an activity-hub that lends support to girls and women, increasing their access to opportunities and enhancing their local participation.

### **Rural Development and Sustainable Agriculture**

The agricultural sector is an important engine of growth in Lebanese rural economies. Given that women represent 43% of the sector worldwide, Safadi Foundation projects and programs give special emphasis to the role of women with the aim of sustaining rural communities and reducing the exodus to urban areas. Projects focus on fostering sustainability through building and enhancing farmers' technical capacities and increasing their competitiveness in the local market.

### **Education and Vocational Training**

The motto of Safadi Foundation is "Wealth in Minds." The Foundation aims to empower girls and women through enhancing their capacity to accelerate their participation in the economy. Activities emphasize continuing education, English language training and ICT labs to help meet the demands of the local and regional labor force.
